

Machine Learning – Model Performance Test

Date	30 July 2026
Student Name	R. Nagarjuna Raju
Project Name	Intergalactic Space Travel Request (ISTR) System
Maximum Marks	10 Marks

Applicability Note

The Intergalactic Space Travel Request (ISTR) project is built entirely on the ServiceNow platform as a scoped workflow automation application. It does not incorporate a Machine Learning model (regression or classification). This template is therefore marked Not Applicable (N/A) for this project, rather than filled with figures that would misrepresent the system that was actually built.

Model Performance Testing:

Project team information for the model performance testing template below.

S.No.	Parameter	Values	Screenshot
1	Metrics	Not Applicable – ISTR is a rule-based ServiceNow workflow application (Business Rules, Flow Designer, ACLs) with no trained ML model, so no MAE/MSE/RMSE/R ² or classification metrics apply.	—
2	Tune the Model	Not Applicable	—
