Project Overview

Project Name: Intergalactic Space Travel Request (ISTR) System

Project Description: A ServiceNow scoped application automating mission request submission, multi-level approval, role-based security, notifications, and reporting for intergalactic space missions.

Project Version: v1.0

Testing Period: 21 Jul 2026 to 27 Jul 2026

Testing Scope

Features and functionalities tested:

- Mission Request submission via Service Catalog (Record Producer)
- Multi-level approval workflow (Manager → Finance → Mission Control)
- Role-based access control (ACLs, Roles, Groups)
- Email notifications on state changes
- Audit Log and SLA dashboard reports

User stories tested: USN-1 through USN-15 (see Data Flow Diagram & User Stories document).

Testing Environment

URL/Location: ServiceNow Personal Developer Instance – Service Portal → Mission Request catalog

Credentials: Role-specific test accounts (Requester, Manager, Finance Officer, Mission Control, Admin) provisioned on the PDI

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit a new mission request as a Requester	1. Open Mission Request catalog item 2. Fill mandatory fields (destination, mission type, risk, cost) 3. Click Submit	Request created with state = Awaiting Manager Approval; confirmation email sent	Request created and email received as expected	Pass
TC-002	Manager approves a valid request	1. Open pending request as Manager 2. Review details 3. Approve	State moves to Manager Approved; routes to Finance Officer	State updated and routed correctly	Pass
TC-003	Finance Officer rejects an over-budget request	1. Open Finance-flagged request 2. Reject with comment	State = Rejected; requester notified with reason	Requester received rejection email with comment	Pass
TC-004	Mission Control gives final approval for a High/Critical risk mission	1. Open Finance-approved, High-risk request 2. Approve as Mission Control	State = Ready for Launch	State updated correctly and visible on dashboard	Pass
TC-005	Requester views only their own requests	1. Log in as Requester 2. Open request list	Only own records visible	Only own records shown, as expected	Pass
TC-006	Admin triggers Launch Mission action	1. Log in as Admin 2. Open a Ready for Launch request 3. Click Launch Mission	State = Launched; audit log entry created	Launch executed and logged correctly	Pass
TC-007	Admin views Audit	1. Log in as Admin 2. Open	Pending/Approved/	Counts matched	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
	Log & SLA dashboard	dashboard	Rejected/Launched widgets show correct counts	underlying records	

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG001	Diplomatic Officer field remained visible after switching Mission Type away from Alien Negotiation	1. Set Mission Type = Alien Negotiation 2. Change to Research 3. Observe field	Low	Closed	Fixed via UI Policy reverse-if condition
BG002	Notification email sent twice on rejection	1. Reject a request 2. Check requester inbox	Medium	Closed	Fixed by removing duplicate notification trigger on Business Rule
